Case Type: Liability - AmWins-Commercial

Children are not allowed in the cafeteria without a teacher supervising them at every moment. When the children enter the cafeteria, they are immediately seated at their designated table and the food is already at the table ready to eat. Once they have finished eating, all of the children exit with the teacher.

The cook is also in the kitchen at all times when children are present. Children do not enter the kitchen area for any reason and are supervised by the cook and the teachers.

The small walkway that accesses the kitchen is strictly monitored at all times when children are present. Children are not allowed to enter the kitchen area.
